

# LARS

*Low Altitude Recon System*

- > Ultra low cost UAV
- > Easy operation Ground Control
- > Fast deployment (2 minutes)
- > Hand take-off and autolanding
- > Two cams already installed
- > Configurable payload (contact factory)

LARS UAV is a complete low cost UAV complete system, featuring with a user friendly Ground Control Station that allows anyone to operate it from the first flight. No need for training or reading complex manuals.

**With LARS UAV anyone can have its own UAV system or even a fleet, no matter the skills or previous knowledge about them.**
